

FULL MISSION PROFILE — MASS CASUALTY INCIDENT MANAGEMENT

THE BEST MANIKIN FOR THE WORST SITUATIONS

With industry-leading durability and easy set-up, rapid reset and low maintenance, the Tactical Operations Medical Manikin from ITTS and Techline Trauma provides the best of all worlds with realistic injuries and hemorrhaging, supported by 160 pounds of solid silicone body and welded steel frame and joints. Simultaneously control up to four units in your scenario with the hand-held remote, each unit customized with up to 250,000 possible wound combinations, making TOMManikin the most effective scenario training manikin available today.

Operational Procedures

- Tourniquets (peripheral & junctional)
- Nasal and oral airways
- Surgical airway with realistic bleeding and tissue dissection
- Remote controlled breathing rates
- Bilateral needle decompression (in 4 locations)
- Chest seal application
- Chest Tube capable (bilateral, all models)
- Radial pulses in uninjured upper extremities and carotid
- Variable pulse rate & pressure
- IO (sternal & humoral) and IV access
