

PART TASK TRAINER

The ITTS line of industry-leading medical manikins has expanded to include a stand-alone and realistic training device that can be used with or without blood flow, the Part Task Trainer. Compact and easy to transport, yet rugged and durable enough for classroom or field use, the Part Task Trainer from the company that produced the best-selling TOMManikin™ is a cost effective solution for skills training.

FEATURES

- Train against both a gunshot wound in the inguinal crease through proper packing and/or use of junctional tourniquets and a fully amputated leg through proper application of a tourniquet.
- Bleeding control via direct interface on the device.
- Compatible with existing TOMManikin™ Bleeder Bag component

Components produced by
